

As an association professional who travels frequently by air, I am writing to strongly oppose any FCC plans to allow cellular phone use on commercial aircraft. In the close confines of an airplane the last thing I want to hear when I am trying to read business documents or rest is someone's loud and inane cell phone conversation. I urge you to keep airplanes free of the cellular babble we hear now in business meetings as well in restaurants, churches, movie theaters and other public places. I urge you to protect the flying public and keep cell phones banned from airplanes -- almost the ONLY cellular free zone in the country. Thank you.
